2. GOING CONCERN ASSUMPTION

These condensed interim financial statements have been prepared on a going concern basis, which assumes that the Company will continue to operate for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. The Company is in the exploration stage and has not earned revenue from operations. As at December 31, 2023, the Company had cash of \$311,361 and a working capital deficit of \$4,471,253. During the three month period ended December 31, 2023, the Company had a net loss of \$101,446 and had negative cash flows from operations of \$379,142. In addition, the Company has a deficit of \$61,683,414.

The above factors indicate that a material uncertainty exists that raises significant doubt about the Company's ability to continue as a going concern. In assessing whether the going concern assumption is appropriate, Management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. This assessment is based upon planned actions that may or may not occur for a number of reasons including the Company's own resources and external market conditions.

The Company's ability to continue as a going concern, realize its assets and discharge its liabilities in the normal course of business, meet its corporate administrative expenses and continue its exploration activities over the next twelve months is dependent upon Management's ability to obtain additional financing, through various means including but not limited to equity financing. No assurance can be given that any such additional financing will be available, or that it can be obtained on terms favorable to the Company.

These condensed interim financial statements do not reflect adjustments that would be necessary if the going concern assumption was not appropriate. If the going concern basis was not appropriate for these condensed interim financial statements, then adjustments would be necessary to the carrying amounts of assets and liabilities, the reported expenses and the classifications used in the statements of financial position.

15. RISK MANAGEMENT AND CAPITAL MANAGEMENT

Risk management

The Company thoroughly examines the various financial risks to which it is exposed and assesses the impact and likelihood of those risks. These risks include credit risk, liquidity risk, currency risk and interest rate risk. Where material, these risks are reviewed and monitored by the Board of Directors.

(i) Credit risk

Credit risk is the risk of an unexpected loss if a party to its financial instruments fails to meet its contractual obligations. The Company's financial assets exposed to credit risk are primarily composed of cash, amounts due from related parties and other receivables and maximum exposure is equal to the carrying values of these assets, totalling \$374,222 at December 31, 2023. The Company's cash is held at several reputable financial institutions with high external credit ratings. The exposure to credit risk for the Company's receivables is considered immaterial. It is Management's opinion that the Company is not exposed to significant credit risk.

None of the Company's financial assets are secured by collateral or other credit enhancements.

Management considers that all the above financial assets that are not impaired or past due for each of the reporting dates are of good credit quality. There are no financial assets that are past due but not impaired for the periods presented.

(ii) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages its liquidity needs by carefully monitoring cash outflows due in day-to-day business. As at December 31, 2023, the Company had a working capital deficiency of \$4,471,253. During the three month period ended December 31, 2023, the Company had negative cash flows from operations of \$379,142 (2022 - \$822,242). The Company's ability to realize its assets and discharge its liabilities in the normal course of business, meet its corporate administrative expenses and continue its exploration activities over the next twelve months is dependent upon Management's ability to obtain additional financing, through various means including but not limited to equity financing. No assurance can be given that any such additional financing will be available, or that it can be obtained on terms favorable to the Company.

As at December 31, 2023, the Company has financial liabilities of \$5,515,155 (\$5,016,580 as at September 30, 2023) all of which are due within twelve months (\$4,956,580 as at September 30, 2023).

Notes to the Condensed Interim Financial Statements (Unaudited) For the three month period ended December 31, 2023 (Expressed in Canadian dollars)

(iii) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Company has limited exposure to financial risk arising from fluctuations in foreign exchange rates given that its transactions are carried out primarily in Canadian dollars.

(iv)Interest rate risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's financial assets exposed to interest rate risk include cash held in interest bearing bank accounts with variable interest rates. The Company has not entered into any derivative contracts to manage this risk. The Company's policy as it relates to its cash balances is to invest excess cash in highly liquid, low-risk, short-term interest-bearing investments with maturities of 360 days or less from the original date of acquisition. To maintain or adjust the capital structure, the Company may attempt to issue new shares. When financing conditions are not optimal, the Company may enter into option agreements or find other solutions to continue its activities or may slow its activities until conditions improve.
